# Heat and Water Vapor Transfer Network Model

Nodes with same numbering facilitates depiction of detailed enlarged model of part

（For example, details inside a wall should be drawn elsewhere rather than on the overall drawing.）

Detailed enlarged model of part

Nodes with same numbering

Nodal correspondence

Heat transfer network model

Water vapor transfer network model

・Correlate the nodes of the three types of network models.
・Absolute humidity is solved, and relative humidity is also calculated from the corresponding temperature.
